

LINE

SUSTAINABLE SHOWER TRAY

KRION SHELL®

Krion Shell® is an Engineered Mineral Composite developed in-house by Krion. It consists of two parts: a structural inner core, made primarily of minerals (dolomite) with an eco-friendly resin binder, and a solid uniform outer surface made of mineral materials (ATH) and resins.

3/4 MINERALS

Most of the inner core of Krion Shell® is made of minerals (dolomite) found in abundance on the planet.

1/4 ECO-FRIENDLY RESINS

To bind the minerals, an eco-friendly resin is used, made of waste plastic. By using recycled PET plastics, waste materials are given a new life and a circular economy is promoted in the creation of Krion Shell®, minimizing the consumption of the planet's resources.

SCS Global Service, a leading North-American independent environmental certification agency, verifies and guarantees that all certified products made of Krion Shell® contain at least 5% recycled waste plastic in their composition, hence contributing to more sustainable, environmentally-friendly manufacturing processes.

At least 5% waste plastic is used in its total composition

LINE

SHOWER TRAY

Made with high quality minerals which provide excellent mechanical features, and with an external layer providing durability.

The Line shower tray allows customisation on demand of both its length (from 75 to 210cm) and width (from 70 to 100cm), as well as adaptation on site.

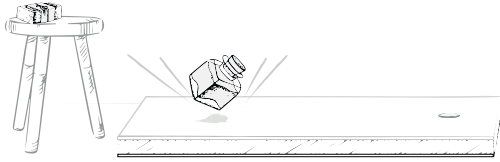

It is available in five different colours - classic white, grey, graphite, beige and taupe - and one Class III Concrete texture.

It also has decorative panels for covering walls, maintaining visual continuity.

made with
KRION SHELL®

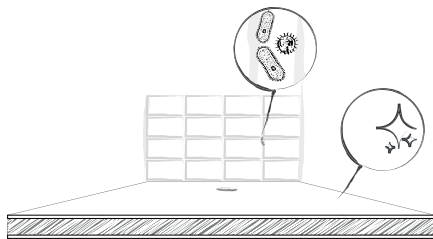

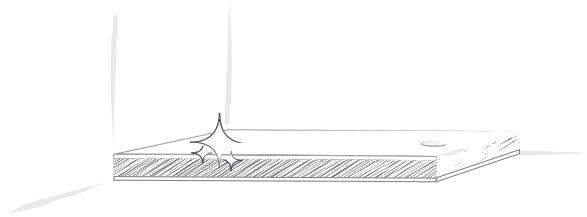

Functional

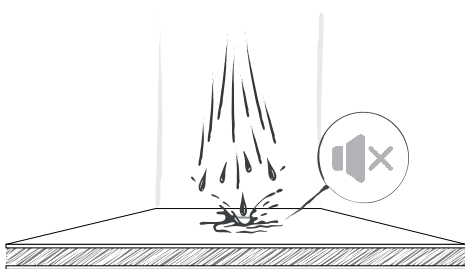

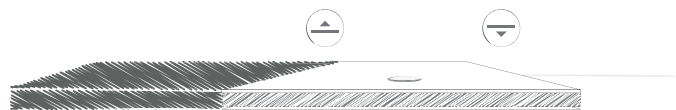

LINE is **impact resistant**, and offers the possibility of repair if necessary.

The advanced covering gives the shower tray unique properties such as **easy cleaning** and maintenance, which helps to reduce the time necessary for daily hygiene.

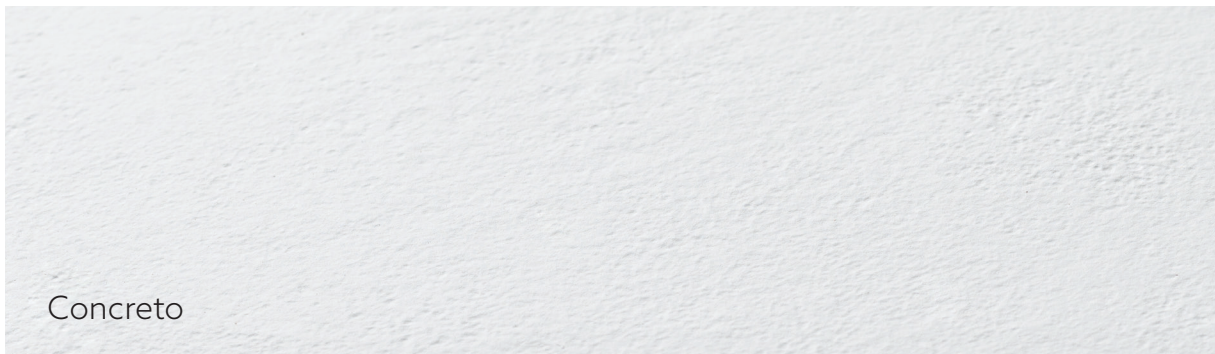

Additionally, the absence of joints **prevents the proliferation of bacteria** on the shower tray, an ideal characteristic for use in high transit areas.

Its **reduced thickness** allows surface or recessed installation, so that entering and leaving the shower is easy, even for people with reduced mobility, and allows the installation of any kind of shower screen on its edge.

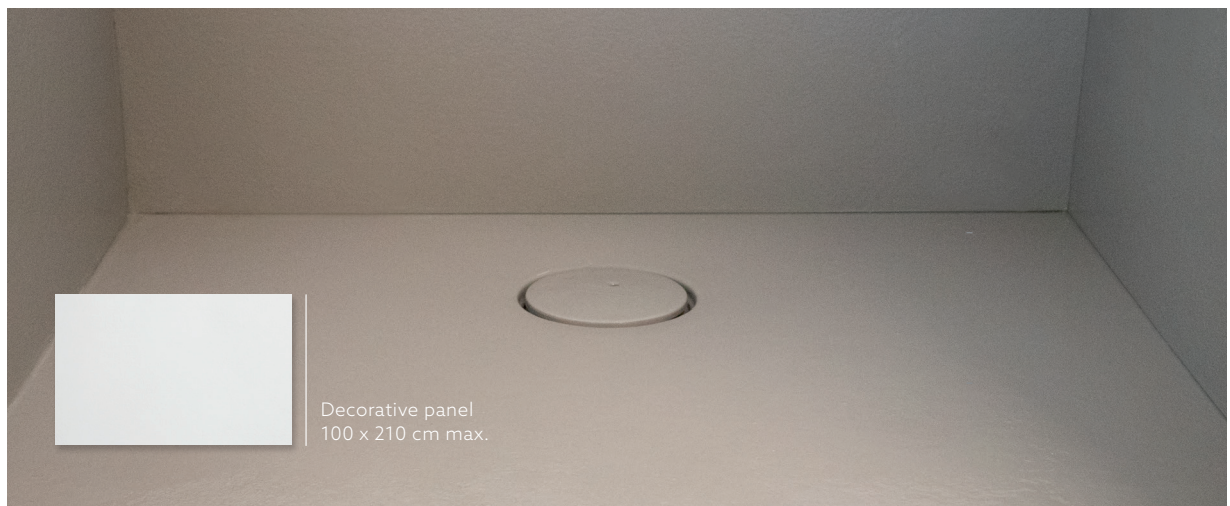

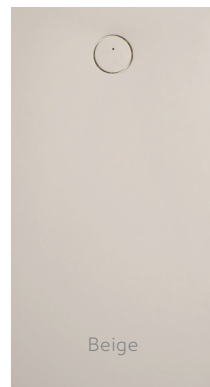

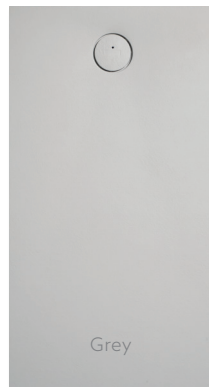

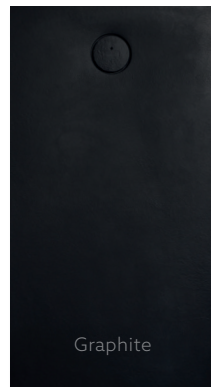

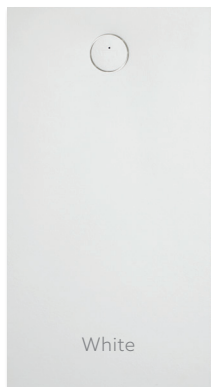

Due to its composition, it has **sound absorption properties**, therefore the water falling on the shower tray makes minimal noise, allowing relaxed, peaceful atmospheres to be created.

Textures and finishes

CLASS III
UNE ENV 12633-2003

The Concrete texture has one of the highest anti-slip values, which along with easy cleaning make the choice of this texture highly recommended for high transit spaces and use by people with reduced mobility and children.

Wide variety of formats with the possibility of adaptation

In addition to being available in a wide variety of formats, in case of requiring a special length or width, the LINE shower tray is supplied already cut, or can be cut on site, to adapt to the needs of the client.

It is not recommended to cut this side

Adaptable up to a maximum of 25mm (in formats of 750mm and 800mm wide)
Adaptable up to a maximum of 50mm (in formats of 900mm and 1000mm wide)

Adaptable up to a maximum of 25mm (in formats of 750mm and 800mm wide)
Adaptable up to a maximum of 50mm (in formats of 900mm and 1000mm wide)

Adaptable up to a maximum of 200mm (in formats of 1200mm long)
Adaptable up to a maximum of 250mm (in formats of 1000mm long)
Adaptable up to a maximum of 300mm (in formats of 1500 and 1800mm long)

It is not recommended to cut this side

Adaptable up to a maximum of 150mm

Adaptable up to a maximum of 150mm

Adaptable up to a maximum of 50mm (in formats of 750mm and 800mm long)
Adaptable up to a maximum of 100mm (in formats 900 mm and 1000 mm long)

The LINE shower tray **can be cut** for adaptation to any space.
